

NATIONAL ARCHERY IN THE SCHOOLS PROGRAM

BRINGING ARCHERY TO YOUR SCHOOL

New Program Announcement for the 2024-2025 School Year!

Program Implementation

All participating schools must agree to comply with the NASP® Operating Principles. Lessons must be taught by a NASP® certified Basic Archery Instructor during the school day, as a part of the in-class curriculum. NASP® Units of Study were written by education, conservation, and target archery experts to meet state and national educational standards. These units were designed for inclusion in a school's Physical Education curriculum.

Instructors:

Kevin Harcarik and Larissa Soroka will serve as course instructors, and additional volunteers will be encouraged to participate as the program grows and expands.

Instructor Training was developed by NASP® so teachers in every participating school could be certified to present lessons that are safe for students, instructors, bystanders, and the facility.

Students:

Sixth grade students will participate in archery lessons as part of the physical education curriculum.

The seventh and eighth grade students will be able to participate in archery as an optional, after-school extracurricular activity.

Equipment:

Archery equipment used in NASP® is highly standardized to be safe, durable, economical, and most importantly, universal fit for almost every student. In NASP® learning the “process” of shooting is stressed far more than arrow scores. The only bow used in NASP® is a “Genesis®” compound which has no let-off and is adjustable from 10-20 pounds in draw weight at any draw length. And the only arrow is the Easton 1820 aluminum “Genesis” arrow.
